Pinion Description / Inside Diameter	Tube Outside Diameter
1¼" / 42.9mm	1 ⁵ / ₈ " / 42.4mm
1" / 34.5mm	1 ³ / ₈ " / 33.7mm
¾" / 27.5mm	1 ¹ / ₈ " / 26.9mm

This pinion unit combines all the best features of our conventional housing with a number of significant improvements. It is ideal for both new installations and refits.

The performance characteristics of all components have been fully tested and proved durable, hardwearing and efficient with overall increased performance through design.

The pinion wheel and the housing are manufactured in two pieces enabling the unit to be installed on the drive tube without the removal of the tube or any other vent gear. Both pinion and housing are rigidly bolted together with A2 Stainless Steel Screws with nylon insert nuts.

Features

- compatible with our existing racks
- hardwearing zinc alloy pinion wheel
- four stainless-steel grub screws for increased grip on the tube
- retro fits in place of IBG rack & pinions
- low friction Delrin slider block & rack guides
- Delrin pinion wheel bearings
